

AbsoluteSport Web Platform — Client Overview

This document explains, in simple terms, what work has been completed, why it matters, and how the system now operates in production.

1. What This System Does

The AbsoluteSport website handles:

- Football academy bookings
- Camp bookings
- Party bookings
- Club/school sports bookings
- Testimonials, reviews and FAQs
- Covers the full booking lifecycle, from user form submission through to payment processing
- Content sourced from Airtable (your CMS)

Everything is now running on a modern, stable, secure platform.

2. Recent Improvements (Nov 2025)

Area	Benefit
------	---------

-----	-----
-------	-------

Airtable protection	Booking forms no longer fail during Airtable outages
---------------------	--

Security hardening	Reduced bot attacks and unexpected traffic
--------------------	--

New fallback system	Visitors see a “Booking Paused” page instead of broken forms
---------------------	--

Logging upgrades	All suspicious / outdated URLs are logged
------------------	---

| Stability in production | No more 429 / rate limit crashes |

| Full platform migration | Upgraded from older Nuxt to Nuxt 4 (modern framework) |

3. Booking Stability

A new protection layer ensures that when Airtable is overloaded, visitors are redirected safely to a ****Booking Paused**** page.

4. Enhanced Security

Includes:

- CSP (Content Security Policy)
- Legacy URL attack logging
- Hardened SSR layer
- Improved reliability of all forms

5. Hosting

Hosted on Netlify:

- Fast global delivery
- Auto scaling
- Serverless API functions

6. Maintenance Recommendations

- Quarterly security review

- Airtable usage monitoring
- Annual performance tune-up
